

## The Last Socialist Election Review Part 1

I will give you one example and explain the technique that was used at the end of this commentary, if you haven't already figured it out from my two commentaries on the Socialist agenda.

What did you witness during the last election? Any substantive material issues or let's hang him he's guilty? In the case of our Senator Mr. Stevens, he came under a heavy political attack. He was falsely accused and put on trial. Evidence was withheld from the defense that would have cleared him.

In 'a joke' they called a trial, where he was hung out to dry by the media, not only locally but nationally. Many Republicans in his own party, especially those running against him used the accusations to slander him.

Meanwhile, the Democrats sank millions of dollars into a slander ad-campaign to give their water-boy (Begich) his chance. The Democrat party knew their boy was dirty and couldn't cut it on his own. So while Begich was campaigning, Mr. Stevens was on trial and could not campaign - defend or even have his trial in this state - the election cycle was in play.

While all the accusations and rumors were flying, Begich was given clear sailing while being involved in a lot of land deals and business shake downs. He had a lot of favors owed to the unions and made sure they were taken care of before he left his office as mayor. The city of Anchorage is currently responsible for these favors.

Begich is the one that should have been on trial. So did they run on issues? No. Did they run on hype and lies? Absolutely! In my opinion, the Governor is being remiss in her job by not appointing a prosecuting attorney to look into these charges that Mr. Metcalf has so glaringly pointed out.

What's good for the goose is good for the gander, if nothing else, make sure the Democrats enjoy the same treatment as the Republicans and oh yes, the American citizens.

Oh my - what a concept! Since writing this, earlier in 2009, Mr. Stevens has been exonerated.
